I have just finished my magnum opus of the week, a very very rough first pass at a specification document for the minimum object set. I have copies for each of you at my desk and I'd like your feedback. Remind me to give you each a copy when I come in on Thursday.

Next week is too crazy for them to contemplate doing anything. We are tentatively planning a meeting after the holidays, with them flying out the afternoon/evening of Monday, Jan. 6, meeting on Tuesday and possibly also Wednesday morning, and departing Wednesday afternoon. This should be plenty of time to cover the stuff we need to cover. I plan this to be strictly a technical working session, so he won't bring Steve Case with him (unless you want to arrange otherwise -- I'd prefer to keep it focused on technical issues if possible thought). He is going to make the travel arrangements. He'd like us to make hotel reservations for him based on our superior knowledge of the local hostelry. I will get Mary to work on that.

He's also going to put the C64 communications code on the system tonight for us to download, with documentation sent by Federal Express tomorrow. I'll set Randy to snarfing that stuff and starting to work with it.
