Randy,

There are some missing files in the tape you have sent to Japan.

I include the list of missing files.

Possible reason why they are missing.

1. PL/I files may have very long name(up to 30 charaters)
2. When they are unloaded to UNIX tape, names would have been truncated to 14 character long.
3. Files with the same name except after 14 characters seemed to be dropped from the tape.

I will be leaving for Las Vegas and Japan on 11/13. Please prepare the tape by 11/11 so that I can bring it with me.

I will visit Lucas film with Fujitsu's executives on 11/10 so I can take that chance to pick up the tape.

Thnaks
