Key

#— Task number — an arbitrary number assigned for tracking purposes.

Task — a short description of the task.

Prio — relative priority of task in the range 1 to 5: 1 simmediately vital, 2 sessential but not immediately so, 3 important, 4 will have to wait for more important items first, 5 desirable someday if we have the time.

Status — current status of task.

Eff — which portions of the system this task effects: p@Commodore 64 program disk, i@Commodore 64 image disk, h@host system, d@design or documentation, w@world database, u@Stratus or Unix based utilities.

Who — who is responsible for performing this task: c@Chip Morningstar, r@Randy Farmer, a@Aric Wilmunder, j@Janet Hunter, g@Gary Winnick, n@Noah Falstein. Names are listed in order of importance to task. Names after a space are secondary personnel for task.

Time — how much time this task should take to complete, once started.

Updat — date that this task's entry in this list was last updated.

Target — target date for completion of this task.
